Summary

Operations & Sales professional with 3+ years of experience coordinating cross-functional workflows, managing documentation, and driving process consistency in production AI environments. Proven ability to track deliverables, maintain structured records, and collaborate across Partnerships, Product, and Client Success teams. Experienced with CRM and project management tools, AI content generation, and prompt architectures for keeping complex, multi-stakeholder projects on schedule.

Experience

Associate AI Project Manager

04/2025 – 03/2026

Ripsey AI

Colorado (Remote)

- Led end-to-end delivery of AI and prompt-engineering projects across Product, Engineering, Partnerships, and Client Success teams.
- Managed project timelines, stakeholder communications, dependencies, and risk mitigation to ensure successful project execution.
- Designed, tested, and optimized prompts for production AI workflows, improving output quality and operational efficiency.
- Coordinated partner onboarding projects, translating business requirements into structured AI workflows and implementation plans.
- Prepared performance reports and client demonstrations while maintaining detailed, audit-ready documentation.

AI Operations Analyst

09/2023 – 04/2025

Ripsey AI

Colorado (Remote)

- Sea Logistics Document Intelligence — Prompt Engineering: Wrote extraction prompts for Bills of Lading, AP Invoices, and Arrival Notices tailored to major ocean carriers (MSC, ONE, Evergreen, Hapag-Lloyd), achieving 95% extraction accuracy.
- Multi-LLM Evaluation & Quality Tracker: Designed and maintained systematic evaluation logs across GPT-4, Claude, and Gemini to flag failure patterns and drive model quality.
- Partner Onboarding & Workflow Architecture: Translated partner business requirements into structured AI workflows, milestone schedules, and repeatable implementation templates.

Sales & Marketing Associate

08/2022 – 12/2022

360 Mails

Nepal

- Led B2B outreach campaigns and managed end-to-end lead generation pipelines, tracking prospects and activities through the full sales funnel
- Conducted market research, prospect identification, and data mining to build qualified partner and client lists for targeted account outreach
- Collaborated with sales and marketing teams on client profiling, outreach strategy, and campaign performance reporting

Education

Bachelor's Degree in Information Management

04/2021 – 10/2025

Tribhuvan University

Kathmandu, Nepal

Skills

- Prompt Engineering | Large Language Models (GPT-4, Claude Sonnet, Gemini) | AI Training | Information Extraction | Document Intelligence | Python | MongoDB | Data Analysis | Data Validation | Data Quality Assurance | Structured Data Extraction | Prompt Optimization | AI Evaluation | Logistics Documentation | Excel | Workflow Automation | Problem Solving

Certificates

- Claude 101 [↗](#)

Projects

RoastBot — AI-Powered Roast Generator [↗](#)

Personal Project

Built and deployed a full-stack AI web application that generates personalized comedy roasts using the Groq LLM API, with dynamic prompt construction based on user inputs (name, occupation, hobby, personal flaw, intensity level)

FIFA World Cup 2026 Predictor [↗](#)

Personal Project

Built an interactive tournament prediction web app covering the full 104-match World Cup format — group stage standings, knockout bracket progression, and champion simulation. Implemented click-to-advance bracket logic, real-time group standings calculation (W/D/L/PTS), live score API integration with match-locking, and JSON export/import for saving predictions. Built with vanilla JavaScript, deployed on Vercel.
